| About **Barijessence**  
Pharmaceutical Company

| **Product** Index

| **Contact** Us

Barij Essence Pharmaceutical Company has always had an active cooperation with research centers and universities. This company's main focus is to make use of the Iranian raw material and to make progress in breeding Iranian herbal plants and Traditional Medicine to grow domestic production and reduce unemployment.

Hossein Hejazi the founder of Barij Essence Pharmaceutical Company was always concerned about the society, especially the environmental and humanitarian issues. He also was active in building mosques and schools and offered private scholarships and funds for the students and individuals who was in financial difficulties or was experiencing health problems. Sports and health was another main concern of Hossein Hejazi and he established the Barij Essence Sport Club in 2005.

Unfortunately, Hossein Hejazi died in June 2010 and buried in the sacred mosque of Mashhad Ardehal next to the tomb of Sohrab Sepehri who was his favorite poem writer.

## Aromix Topical Gel

Analgesic - Alleviation of musculoskeletal pain  
Anti-inflammatory

[More info](#)

# Aromix Topical Gel

## ■ Method of use:

Three times a day, each time apply a thin layer of Aromix Barij topical gel on the painful and inflamed area.

## ■ Ingredients:

Essential oil of lavender (*Lavandula angustifolia*)  
Essential oil of eucalyptus (*Eucalyptus* spp)  
Essential oil of rosemary (*Rosmarinus officinalis*)  
Essential oil of peppermint (*Mentha piperita*)

## ■ Pharmaceutical form:

Gel-tube laminated inside 75g aluminum in a cardboard box with a brochure

## ■ Standardization:

Based on presence of 0.185% menthol and 2.18% 1,8-cineol in the product.

## Osteofix Topical Cream

Anti - inflammatory and analgesic for musculature pain

[More info](#)

# Osteofix Topical Cream

## ■ Method of use:

Three times a day, each time a thin layer of the cream must be applied topically to the affected area

## ■ Ingredients:

Lavandula angustifolia, Eucalyptus spp., Rosmarinus ofcinalis, Mentha piperita and Ostrich oil as a base for the cream

## ■ Pharmaceutical form:

Topical cream, 30g tube, with an insert in a folding carton

## Barij Black Seed Oil

Adjuvant treatment of rheumatoid arthritis  
Relieve joint and back pain  
Relieve muscle and skeletal pain caused  
by cold temper

[More info](#)

# Barij Black Seed Oil

## ■ Method of use:

3times a day, rub some amount of oil on desired area

## CM - Topical - lotion

Alleviation of pain in knee osteoarthritis

Tendon injuries

Alleviation of musculoskeletal pain

[More info](#)

# CM - Topical - lotion

## ■ Method of use:

Depending on the size of the painful area; 4 times a day, massage some of the CM Barij® lotion on the area. It is best to avoid application of product close to bedtime because mint essential oil can alter the normal pattern of sleep.

## ■ Ingredients:

Essential oils of *Apium graveolens* and *Mentha spicata*

## ■ Pharmaceutical form:

15 ml glass with dropper and information leaflet in cardboard box

## CM - Topical Spray

Alleviation of pain in knee osteoarthritis

Tendon injuries

Alleviation of musculoskeletal pain

Muscle spasm

[More info](#)

# CM - Topical Spray

## ■ Method of use:

Depending on the size of the painful area; 4 times a day, spray maximum 3 puffs of the product on the area.

## ■ Ingredients:

Essential oils of *Apium graveolens* and *Mentha spicata*

## ■ Pharmaceutical form:

30 ml spray with information leaflet in cardboard box

## Capex Barij Topical Cream

osteoarthritis, rheumatoid arthritis  
post-herpetic neuralgia  
Alleviation of diabetic neuropathy pain  
pain and spasm in shoulder, arms,  
backbone and legs

[More info](#)

# Capex Barij Topical Cream

## ■ Method of use:

Up to 4 times per day, apply a small amount of the product to the painful spot, continue for at least 2 weeks. Little clinical data exists for more than 8 weeks of application.

## ■ Ingredients:

Extract of pepper (*Capsicum* spp.) capsaicin, 6,7 dihydrocapsaicin, nordihydrocapsaicin

## ■ Pharmaceutical form:

30g tube bottle in cardboard box Patient information leaflet inside

## ■ Standardization:

Based on presence of 0.034-0.046 percent capsaicin in the product.

## Menta Lotion Topical

Tension headache  
Musculoskeletal pain  
Nasal congestion

[More info](#)

# Menta Lotion Topical

## ■ Method of use:

### **For headache:**

Rub 5-10 drops of Mentha Topical Solution to the forehead and temples, repeat after 15-30 minutes if necessary.

### **For musculoskeletal pain:**

Rub 5-10 drops of Mentha Topical Solution to the affected area, 3-4 times per day.

### **For nasal congestion:**

2-3 times per day, rub 2-3 drops of Mentha Topical Solution on the upper lip or impregnate a clean tissue with few drops and cover the nose with it.

## ■ Ingredients:

Essential oil of peppermint (*Mentha piperita*)

## ■ Pharmaceutical form:

15ml drop with dropper in cardboard box  
Patient information leaflet inside.

## ■ Standardization:

Based on presence of 24-36 mg menthol per ml of the product.

## Netonal Barij Tablet

Alleviation of musculoskeletal pain

Diuretic (to clear the urinary system in inflammatory urologic conditions)

Prevention of formation of urinary stones

[More info](#)

Capsule, 10 numbers 3 blister, information leaflet in cardboard box

## Proliv Barij Capsule

Effective in the prevention and treatment  
of fatty liver  
Gallbladder protector

[More info](#)

# Proliv Barij Capsule

## ■ Method of use:

1-3 times per day, each time one capsule or as directed by a physician.

## ■ Ingredients :

Silybum marianum, Cynara scolymus, Curcuma longa, Taraxacum officinale

## ■ Pharmaceutical form :

Capsule with information leaflet in cardboard box

## Supermint Soft Capsule

Carminative

Gastrointestinal analgesic and antispasmodic

Anti-dyspepsia

Stomachic

[More info](#)

# Supermint Soft Capsule

## ■ Method of use:

Take a soft capsule with some water 3 times a day after the main meal.

## ■ Ingredients:

Essential oil of Menthaspicata

## ■ Pharmaceutical form:

Container with 30 soft capsules and patient information leaflet in cardboard box.

## Supermint Oral Drop

Carminative

Gastrointestinal analgesic and antispasmodic

Anti-dyspepsia

Stomachic

[More info](#)

# Supermint Oral Drop

## ■ Method of use:

After every meal, mix 20 drops of the product in to a small glass of water.

## ■ Ingredients:

Essential oil of mint (*Mentha spicata*)  
carvone and methyl acetate

## ■ Pharmaceutical form:

15ml drop with dropper in cardboard box  
Patient information leaflet inside

## ■ Standardization:

Based on presence of 11-15 mg (-)-carvone per ml of the product.

## Anti-Reflux-B Syrup

Adjuvant treatment for alleviation of symptoms of Gastroesophageal Reflux Disease (GERD)

[More info](#)

# Anti-Reflux-B Syrup

## ■ Method of use:

1-2 tea spoonful (5-10 ml) before breakfast and before sleep.

## ■ Ingredients:

Aloevera leaf gel (Aloevera), with its anthraquinone substances having been adjusted to a proper amount.

Polysaccharides including acemannan, glucomannan, anthraquinone glycosides like aloin, aloe-emodin and barbaloin

## ■ Pharmaceutical form:

120ml syrup bottle in cardboard box  
Patient information leaflet inside

## ■ Standardization:

Based on presence of about 5/2 mg polysaccharide per 5ml of syrup.

## M.G Topical Lotion

Adjuvant therapy for alleviation of hemorrhoid degree I and II symptoms, like bleeding, pain, itching, burning and heaviness of the anus and tenesmus.

Adjuvant therapy for anal fissure.

[More info](#)

# M.G Topical Lotion

## ■ Method of use:

Twice a day, dab 10-15 drops of the lotion on a cotton ball and rub the anal area. It is recommended to thoroughly rinse and lather the anal area with lukewarm water before application.

## ■ Ingredients:

Essential oil of common myrtle (*Myrtus communis*).

## ■ Pharmaceutical form:

15 ml drop with dropper in cardboard box Patient information leaflet inside

## ■ Standardization:

Based on presence of 30 mg 1,8-cineole per ml of the product.

## M.G Ointment

Ajuvant treatment for hemorrhoid degree I and II symptoms, like bleeding, pain, itching, burning and heaviness of anus and tenesmus. Adjuvant treatment for anal fissure.

[More info](#)

# MG Ointment

## ■ Method of use:

If the doctor has not given a different order, use an anal applicator of ointment ,2 times a day for 2 weeks

# Anti-Fissure Topical Cream

Adjuvant treatment for anal fissure

[More info](#)

# Anti-Fissure Topical Cream

## ■ Method of use:

Twice a day, apply a thin layer of cream in the anal fissure area.

## ■ Ingredients:

Extract of chamomile (*Matricaria chamomilla*) and Aleppo oak gall (*Quercus infectoria*)

## ■ Pharmaceutical form:

30 g tube in cardboard box Patient information leaflet inside

## ■ Standardization:

Based on presence of 0.077-0.104 mg apigenin and 22.85-30.9mg phenol per g of the product.

# Castorex Barij Soft Capsule

Laxative

Treatment of constipation

[More info](#)

# Castorex Barij Soft Capsule

## ■ Method of use:

Take one soft capsule with food 1-2 times a day.

## ■ Ingredients :

Castor (*Ricinus communis* L.) oil and fennel (*Foeniculum vulgare*) essential oil

## ■ Pharmaceutical form :

Container with 60 soft capsules and patient information leaflet in card board box.

## Lomex Soft Capsule

Adjuvant treatment for non-infectious diarrhea  
(reduction in cramps, number of trips to the toilet  
and duration of the diarrhea)

[More info](#)

# Lomex Soft Capsule

## ■ Method of use:

1 soft capsule every 8 hours, for 3 days

## ■ Ingredients:

Essential oil of summer savory (*Saturejahortensis*).

## ■ Pharmaceutical form:

50mg soft capsule in cardboard box  
Patient information leaflet inside

## ■ Standardization:

Based on presence of 22.5-17.5 mg carvacrol per soft capsule.

## Lomex Oral Drop

Adjuvant treatment for non-infectious diarrhea  
(reduction in cramps, number of trips to the  
toilet and duration of the diarrhea)

[More info](#)

# Lomex Oral Drop

■ **Method of use:**

20 drops with a cup of water , 3-4 times a day for 3 days

## Gastrolit Soft Capsule

Adjuvant treatment for Irritable Bowel Syndrome (IBS) symptoms including pain, flatulence, heartburn, GERD and changes in stool consistency

[More info](#)

# Gastrolit Soft Capsule

## ■ Method of use:

Take one capsule every 8 hours.

## ■ Ingredients :

Essential oil of Iranian thyme (Zataria multiflora)

## ■ Pharmaceutical form:

20 mg soft capsules in cardboard box Patient information leaflet inside

## ■ Standardization:

Based on presence of 5.5-6.5 mg thymol per soft capsule.

## Gastrolit Oral Drop

Adjuvant symptomatic treatment of Irritable Bowel Syndrome (IBS)

[More info](#)

# Gastrolit Oral Drop

## ■ Method of use:

Take 20 drops with some fluids every 8 hours.

## ■ Ingredients:

Essential oil of Iranian thyme (*Zataria multiflora*)

## ■ Pharmaceutical form:

15ml drop with dropper in cardboard box  
Patient information leaflet inside

## ■ Standardization:

Based on presence of 4.4-7 mg thymol per ml of the product.

## Golghand Barij Ma'jun

Purgative and aperient, especially in pregnant women and children over 2 years of age

[More info](#)

# Golghand Barij Ma'jun

## ■ Method of use:

Adults: 1 to 2 tablespoons, 3 times a day, half an hour before meals with 1 cup of warm water.

Children over 30 kg: 1 teaspoon, 3 times a day, half an hour before meals with half a cup of warm water.

Children under 30 kg: 1 teaspoon, 3 times a day, half an hour before meals with half a cup of warm water.

## ■ Ingredients:

Fresh petals of Rosa damascene, Honey

## ■ Pharmaceutical form:

100gr Majoon with information leaflet inside

## Hepatoheal Chewable Tablet

Stimulation of liver metabolism

Adjuvant treatment for liver disorders such as hepatitis, especially chronic hepatitis B and hepatic fibrosis

Eczema, Constipation, Hemorrhoids, Varicose veins

[More info](#)

# Hepatoheal Chewable Tablet

## ■ Method of use:

2-3 times a day, chew 1-2 tablets before a meal. The minimum course of treatment is 4 weeks.

## ■ Ingredients:

Leaves and twigs of vine (*Vitis vinifera*) and whole plant of strawberry (*Fragaria vesca*)

## ■ Pharmaceutical form:

250 mg chewable tablets in containers of 200 in cardboard box. Patient information leaflet inside

## ■ Standardization:

Based on the presence of 62 µg cyanidin 3-glucoside in mean tablet

## Barij Rose Oil Soft Capsule

Relieve of gastritis and Inflammatory Bowel Disease (IBD)

[More info](#)

# Barij Rose Oil Soft Capsule

## ■ Method of use:

Inflammation of the stomach, Gastroesophageal reflux disease (GERD), Inflammatory bowel disease (IBD)

## ■ Dosage and Administration:

Inflammation of the stomach: 1 soft capsule, three times a day before meal.

Gastroesophageal reflux disease (GERD): 2 soft capsules, three times a day before meal.

Inflammatory bowel disease (IBD): 2 soft capsules, three times a day before meal

## ■ Ingredients:

Rosa damascena mill L., Sesamum oil

## ■ Pharmaceutical form:

Container with 30 soft capsules 1000 mg, with information leaflet in cardboard box

# Jalinus Barij Syrup

Anti-nausea of pregnancy  
Digestive, stomach tonic

[More info](#)

# Jalinus Barij Syrup

## ■ Method of use:

### **Pregnancy Nausea:**

10-20 milliliters 3 times a day, before each meal.

Stomach strengthening:

Adults: 10-20 milliliters 3 times a day, before each meal

Children over 5 years: 5-10 milliliters 3 times a day, before each meal

### **Indigestion treatment:**

Adults: 10-20 milliliters 3 times a day, after each meal

Children over 5 years: 5-10 milliliters 3 times a day, after each meal

## ■ Ingredients:

Cydonia oblonga, Zingiber officinale, Honey, vinegar

## ■ Pharmaceutical form:

120 ml syrup bottle with information leaflet in cardboard box

## ■ Standardization:

Based on presence of 0.034-0.046 percent capsaicin in the product.

## Safflower Oil

Anti - flatulence  
Relieve of colic

[More info](#)

# Safflower - Oil

## ■ Method of use:

Apply topically 2-3 times a day.

## ■ Ingredients:

Safflower seed (*Carthamus tinctorius* L.) oil

## ■ Pharmaceutical form:

30ml container Patient information leaflet inside

## ■ Standardization:

Based on presence of 68-83% linoleic acid in the product.

Syrup, 120 ml syrup bottle with information leaflet in cardboard box

## Vagiheal Barij

Natural vaginal moisturizer

Relieves dryness, burning, itching and painful intercourse due to vaginal atrophy

[More info](#)

# Vagiheal Barij

## ■ Method of use:

This product is applicable to the vulva and inside of the vagina. Use the applicator inside the package, to apply 2.5 gram of the gel into the vagina for 7 consecutive nights at bedtime; continue using twice a week (Maintenance therapy). For prolonged effects of the medication, it is possible to use it more than once a day as you wish. You can also apply the product to the vulva (around the vagina and external areas); this can help facilitate sexual activity and improve vaginal dryness. The product can be used during menstruation; it is also possible to use it with a condom. Avoid applying the gel by applicator during pregnancy. Instead, squeeze an applicator-measured amount of the gel onto your finger, and gently and carefully apply it to the affected area, in a way you feel comfortable.

For using the product, first remove the foil seal of the orifice of the tube and screw end of the applicator onto the tube. Pull back the plunger, and gently squeeze the tube until the barrel is half-filled. Unscrew the applicator. Put yourself in a comfortable position and insert the applicator into the vagina. Push the plunger gently until the content of the applicator has been thoroughly emptied into the vagina. It is recommended to apply a thin layer of the gel over the edge of the applicator to facilitate the insertion.

## ■ Ingredients:

Humulus lupulus and Vit E

## ■ Pharmaceutical form:

Vaginal gel, 30g tube, with an applicator and an insert in a folding carton

## Menohep Barij Capsule

Alleviation of menopause-related symptoms,  
like hot flashes and night sweats

[More info](#)

# Menohelp Barij Capsule

## ■ Method of use:

Take one capsule per day with a meal. Maximum daily dose is 2 capsules per day or as prescribed by a physician. For use over one year consult a physician.

## ■ Ingredients:

Black cohosh (*Actaea racemosa* L.), Soybean (*Glycine max*), Sweet potato (*Dioscorea villosa*), Greater burdock (*Arctium lappa* L.), Vitex (*Vitex agnus-castus*)

## ■ Pharmaceutical form:

550 mg capsules in plastic container in cardboard box Patient information leaflet inside

## ■ Standardization:

Based on presence of at least 40 mg total phenolic based on daidzein and at least 3 mg diosgenin per capsule.

# Leucorex Vaginal Cream

Adjuvant therapy for vaginal infections caused by *Candida* and *Gardnerella* species

[More info](#)

# Leucorex - Vaginal Cream

## ■ Method of use:

Apply one applicator inside the vagina everynight, for 7 to 10 consecutive nights.

## ■ Ingredients:

Iranian thyme essential oil (Zataria multiflora)

**Active Ingredients:** thymol and carvacrol

## ■ Pharmaceutical form:

50g tube with applicator in cardboard box Patient information leaflet inside

## ■ Standardization:

Based on presence of at least 0.027-0.033 percent thymol in the product.

## Fennelin Soft Capsule

increase of milk production in nursing mothers  
adjuvant therapy for alleviation of primary  
dysmenorrhea

[More info](#)

# Fennelin - Softcapsule

## ■ Method of use:

Take a soft capsule every 4 hours

## ■ Ingredients:

Essential oil of *Foeniculum vulgare*

## ■ Pharmaceutical form:

Container with 30 soft capsules and patient information leaflet in cardboard box.

## Fennelin Oral Drop

Increase in breastmilk

Adjuvant treatment for alleviation of primary dysmenorrhea

[More info](#)

# Fennelin Oral Drop

## ■ Method of use:

Every 4 hours, take 30 drops with some fluids.

## ■ Ingredients:

Essential oil of sweet fennel (Foeniculum vulgare)  
Active Ingredients: trans-anethole, fenchone, methyl chavicol, estragole

## ■ Pharmaceutical form:

15ml drop with dropper in cardboard box Patient information leaflet inside

## ■ Standardization:

Based on presence of 12-19mg anethole perml of the product.

## Barij EPO (Evening Primrose Oil)

Anti-inflammatory of the stomach  
improvement in symptoms of Irritable  
Bowel Syndrome (IBD)

Syrup, 120 ml bottle, with a spoon and an insert in a folding carton

## Barij Baby Cream

Prevention and treatment of napkin dermatitis  
Softness and elegance of the skin

[More info](#)

# Barij Baby Cream

## ■ Method of use:

Apply a thin layer on the intended area and repeat if needed. To prevent diaper rashes constantly check the baby's diaper so that you can change it as soon as it becomes wet or dirty. Gently rinse the baby's skin with lukewarm water and pat it dry with a soft, cotton cloth. Apply a thin layer of Diaper Rash Cream to the skin to form a protecting barrier against the moisture and irritations caused by urine and stool. This procedure is of more importance during the night, when your baby's skin would be in contact with the diaper longer. To treat diaper rash, as soon as seeing the initial signs of redness, instantly set out to treat it. Gently wipe the skin clean, allow it to dry, and then apply a thin layer of Barij Baby Cream to the skin. Repeat this procedure every time you change the diaper. Constantly check the diaper, especially after feeding the baby, and once needed, change it at the earliest possible chance.

## ■ Ingredients:

Pot marigold (*Calendula officinalis*), German chamomile (*Matricaria chamomila*), Lavender (*Lavandula angustifolia*), Aloe (Aloe vera)

## ■ Pharmaceutical form:

50 g tube in cardboard box Patient information leaflet inside
